

A dozen of *undercover* nuclear physicists in an astrophysics department.

Development of large-scale energy density functional (EDF) models and applications.

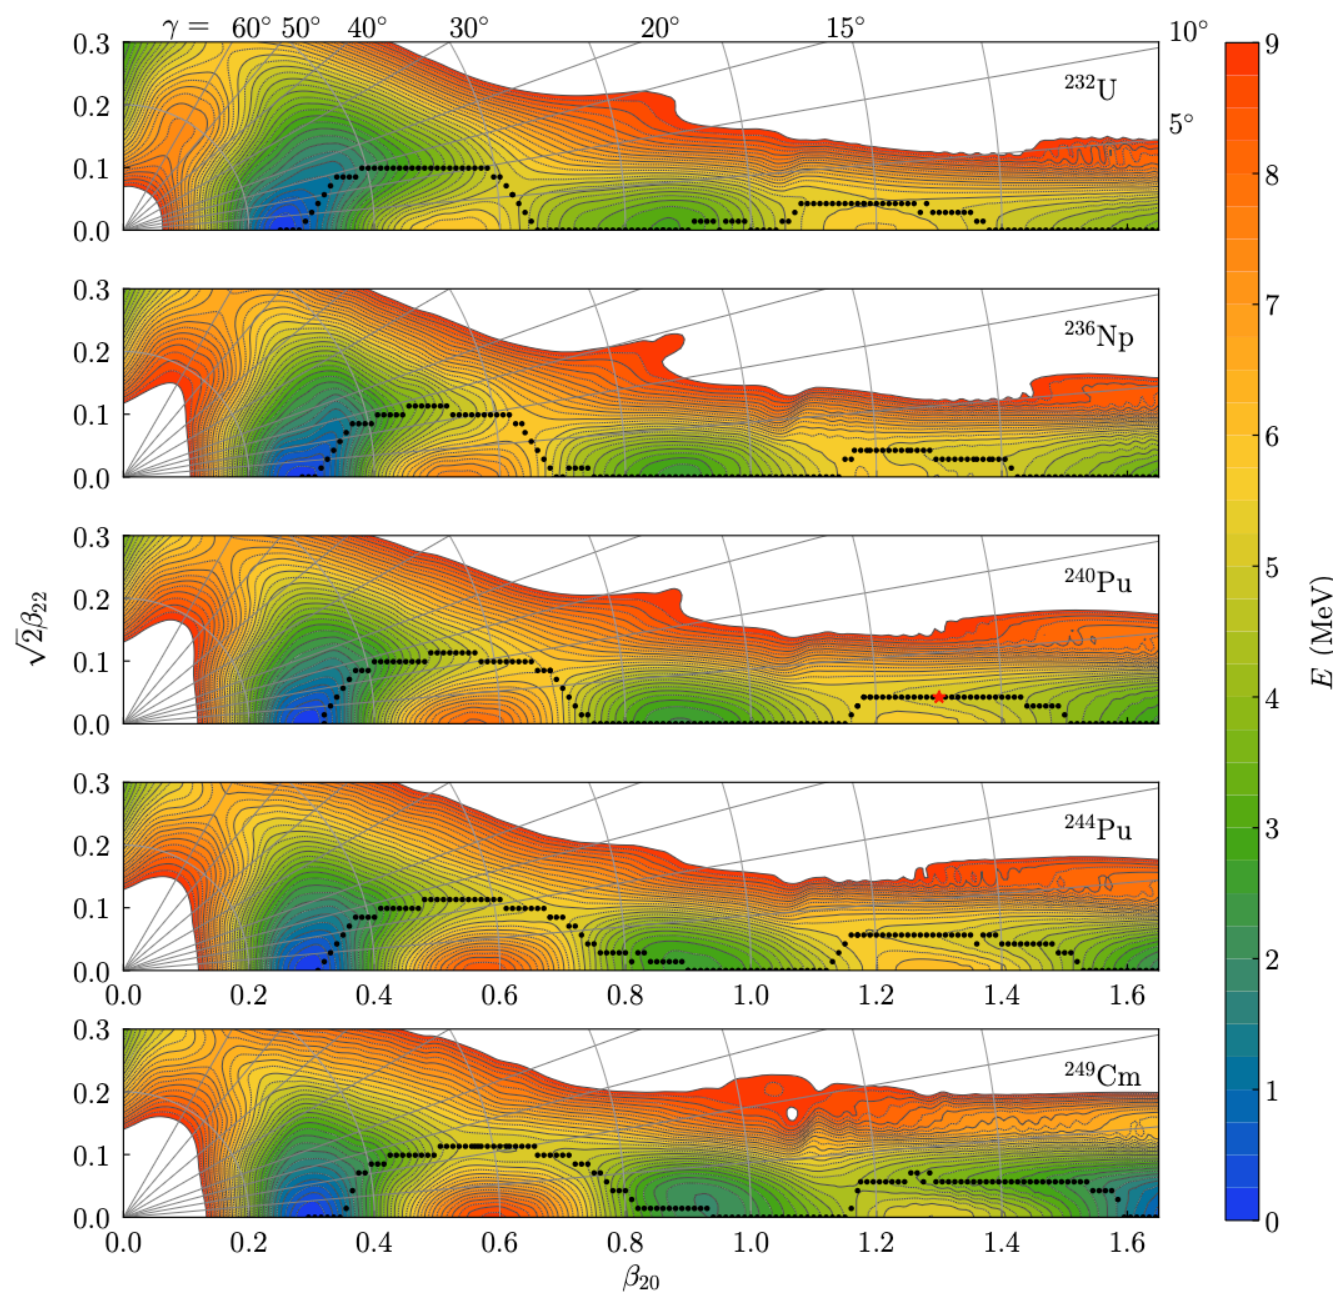

- New (Skyrme-like) functionals: BSkG
- Large-amplitude collective motion
- Fission
- Nuclear pasta
- r-process simulations

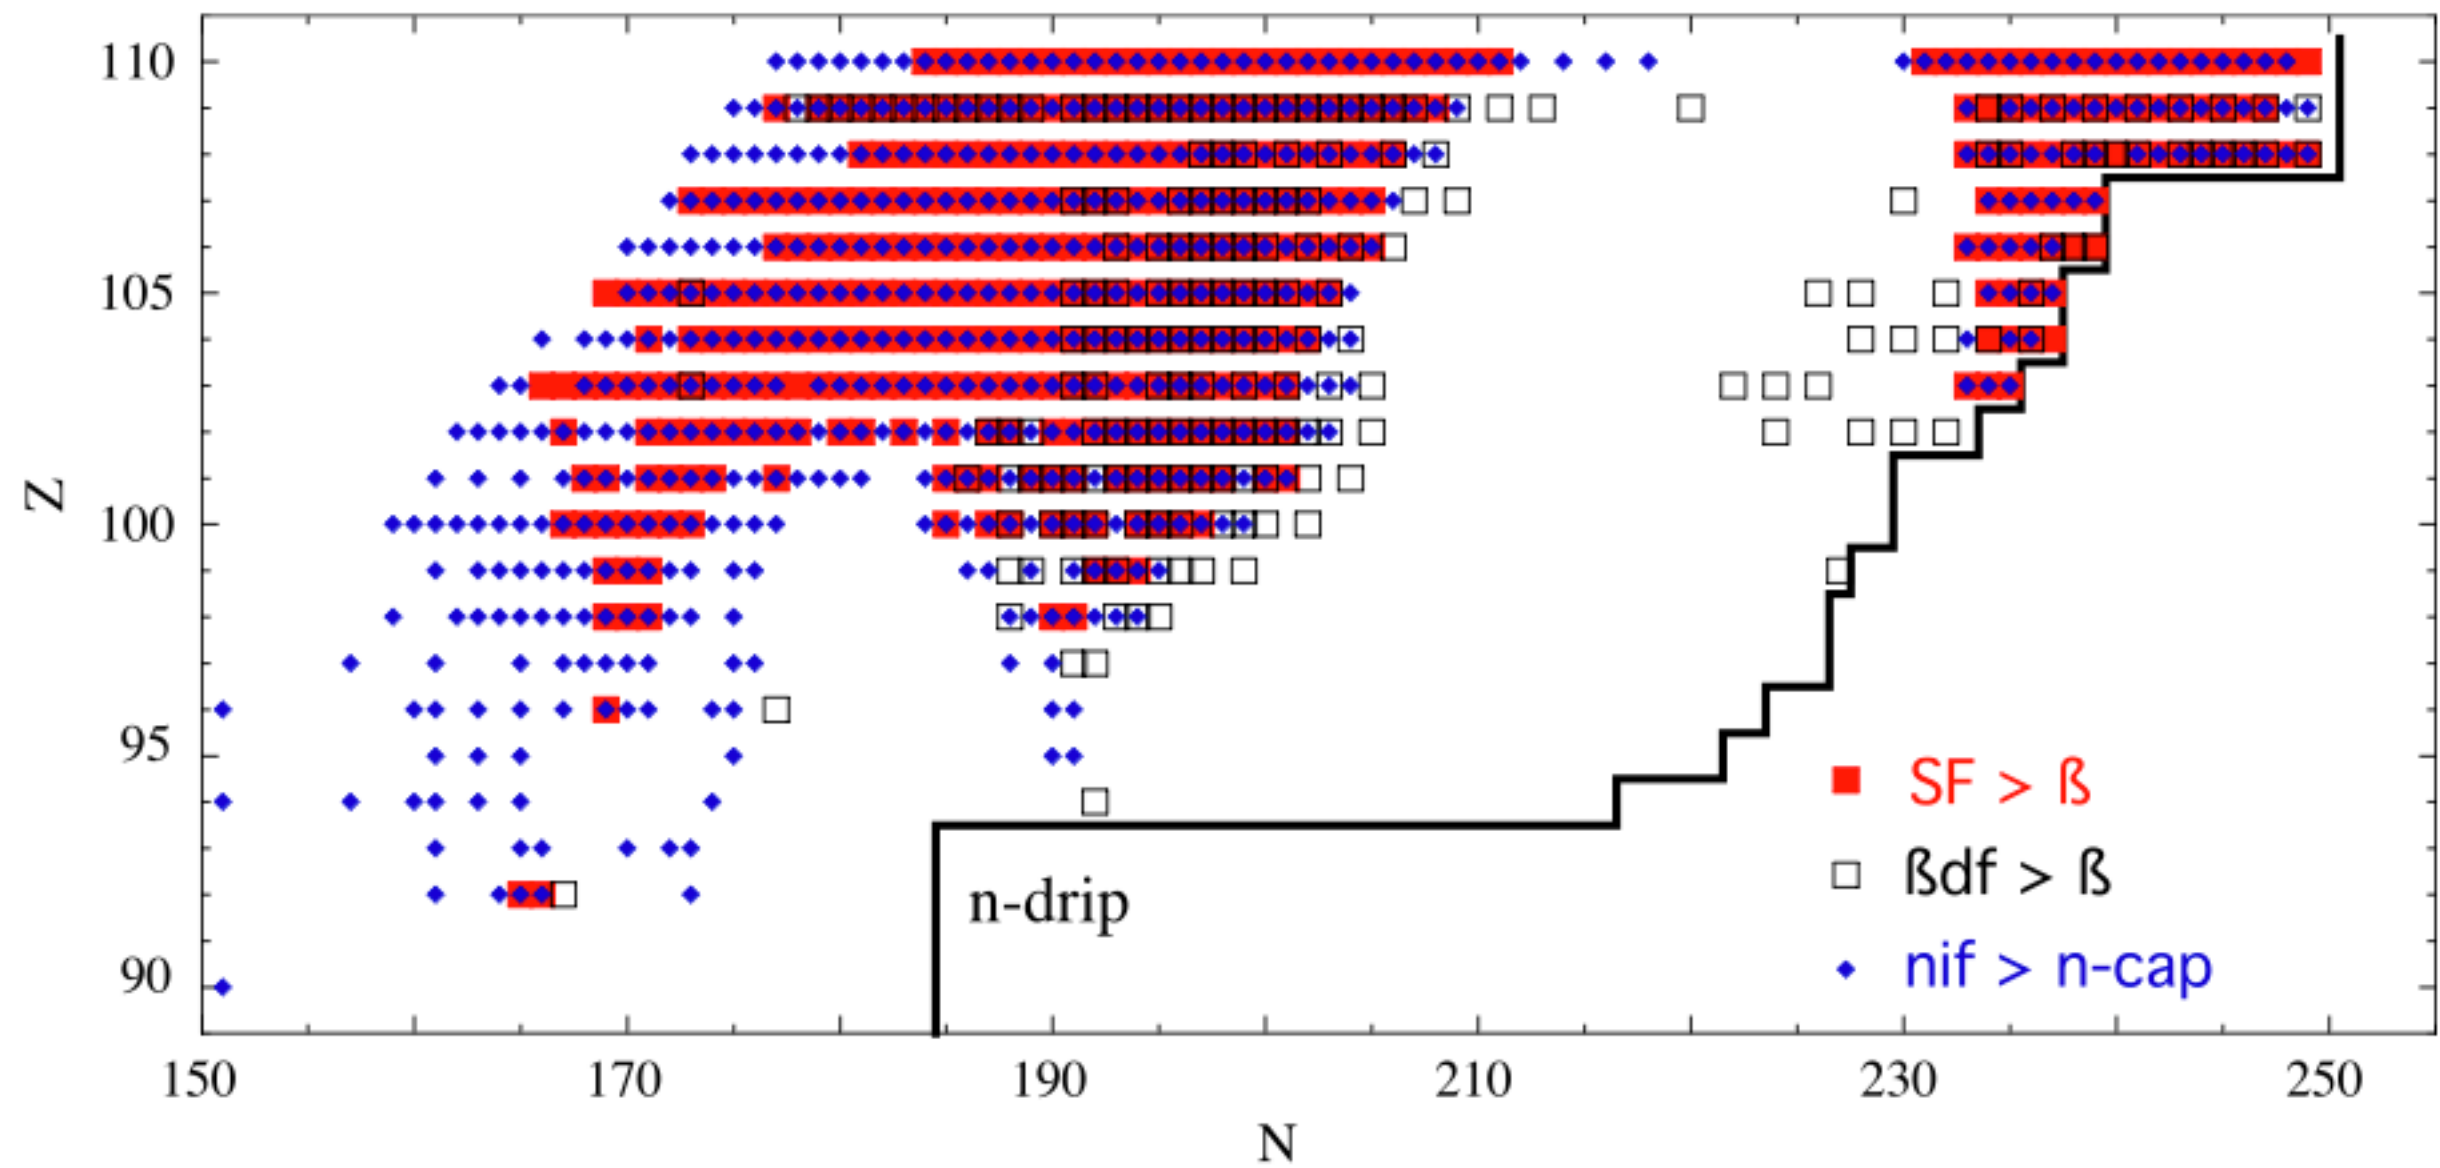

G.Grams et al, Eur. Phys. J. A (2023) 59:270

W. Ryssens et al, Eur. Phys. J. A (2023) 59:96

Stephane Goriely *et al* 2011 *ApJL* **738** L32
